

38CKG Air Conditioner and 38YCG Heat Pump

Turn to the Experts.™

Turn to the Experts

Willis Carrier invented air conditioning in 1902. Over 100 years later, we're proud to say Carrier systems are trusted in more homes than any other brand.

Carrier continues to be on the forefront of innovative engineering and unsurpassed standards of excellence. So when choosing a home comfort system, you'll want to turn to the experts. Your Carrier dealer will evaluate your home, such as window placement and size, ductwork, other structural specifics and lifestyle to provide a customized indoor comfort plan designed specifically for you. And when you have an expert helping you make an educated decision, you're going to feel more comfortable.

Manufacturer reserves the right to discontinue, or change at any time, specifications or designs without notice or without incurring obligations.

Always look for these symbols, the air conditioning and heat pump industry seals of certified performance, efficiency and capacity.

Designed for Durable, Long-Lasting Performance

Efficiency

Seasonal Energy Efficiency Ratio or SEER number and Heating Seasonal Performance Factor or HSPF are like gas mileage. The higher the rating, the more efficient the auto-mobile or system is.

- Carrier's 38CKG air conditioner is available with an efficiency rating from 10.0 SEER.
- The 38YCG heat pump has efficiency ratings from 10.0 SEER and 7.2 HSPF.

Things to Consider Before You Buy

Comfort

Carrier specializes in creating a customized home comfort system tailored to your needs with our broad selection of heating and cooling products. Your Carrier dealer can help you choose the best system for your home including Carrier-exclusive features that further enhance your indoor environment. Carrier's 38CKG air conditioner and 38YCG heat pump deliver reliability and proven comfort in a compact design.

Reliability

At Carrier, your comfort is our business. That's why we have one of the most extensive product research and development facilities in the world. Within every step of the development process, from the design phase to the finished product, we test each and every product to exceed industry standard requirements. In fact, Carrier designs every air conditioner and heat pump for applications up to 125 degrees. That's a full 10 degrees higher than the industry standard.

Durability

Neither rain nor hail nor golf or soccer balls can keep a Carrier system from doing its job – they're built tough inside and out.

Inside

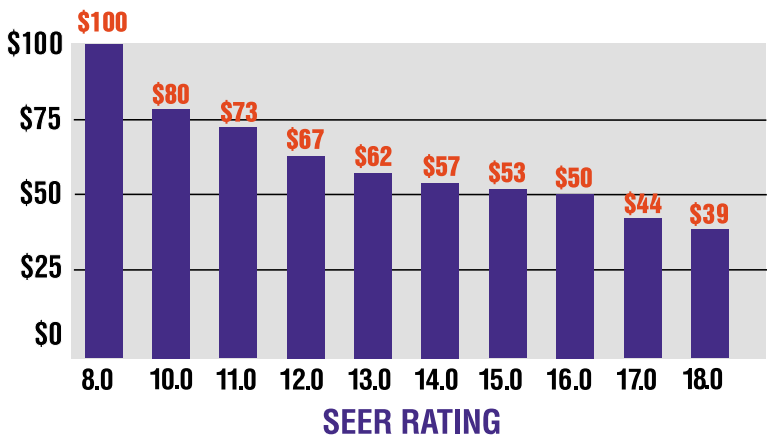

- Carrier's compressor design has the most trouble-free performance record of any compressor on the market today. An extra-thick shell protects the life of your compressor for excellent reliability.

Outside

- WeatherArmor™ protection helps keep your system looking and operating its best for years to come.

Greater Operational Efficiency

For every \$100 spent to cool your home using an 8.0 SEER system, a 10.0 SEER system should cost you approximately \$80. Actual savings will depend upon your current efficiency rating versus your newer system efficiency rating.

Technology

- Aerodynamic top** – enhances airflow through the outdoor unit, and reduces noisy turbulence.
- Compressor** – as the heart of the cooling system, the compressor pumps refrigerant throughout the system.
- Copper tube/aluminum fin coil** – transfers heat outside to maximize indoor cooling while resisting corrosion.
- WeatherArmor™ cabinet** – constructed of galvanized steel finished with a baked on powder paint, resists scratches and corrosion.
- WeatherArmor™ grille** – protects coil from debris 3/8" or larger.

Specifications

Air Conditioners	Infinity™ System	Two-Speed Compressor	Scroll Compressor	SEER	Energy Star®	Puron® Refrigerant	Silencer System	Sound Ratings Under 75 dB
